

Skills

- **Programming Languages** : Javascript, Python, Go
- **Libraries and Frameworks** : React, Node.js, Next.JS, .NET
- **Tools** : Microservices, AWS, Azure

Experience

Senior Software Engineer

May 2025 - Present

Wipro

- Built Go-based backend services, improving API response time by 30–40%
- Led Azure deployments with CI/CD, reducing release time by 50%
- Cut cloud costs by 20% via infra optimization
- Implemented micro frontend architecture, reducing release cycles by 40%

Software Engineer (Full Stack)

Apr 2021 - Present

Envigo Technologies

- Built PWAs with React/Redux, increasing engagement by 30%
- Reduced load time by 70% using Next.js optimizations
- Integrated Firebase for real-time features and auth
- Used AWS CloudWatch for monitoring and reliability
- Led 5+ devs, improving delivery speed by 20%

Software Engineer

Jul 2020 - Mar 2021

Sinsignal Technologies

- Developed scalable apps with React, Node.js, Express (traffic +15%)
- Integrated Zoom API, improving collaboration efficiency by 40%
- Reduced user issues by 25% via performance improvements
- Built/tested gRPC services for reliability

Software Engineer

Sep 2019 - Jun 2020

Teknuance Info Solutions

- Migrated .NET APIs to Node.js, reducing response time by 25%
- Delivered multiple full-stack projects (+40% engagement)

Projects

Supersonic

<https://www.supersonicimagine.com/>

React, GraphQL, Node.js

- Improved API performance by 30% and reduced load time by 40%
- Implemented reCAPTCHA, reducing spam by 50%

Inplass

<https://www.inplass.com/>

React (PWA), Node.js, Firebase

- Built multi-role hotel management platform (efficiency +30%)
- Developed PWA, increasing engagement by 40%

Desiweds

<https://desiweds.com/>

React, Node.js, PWA

- Built matchmaking platform for 1,000+ users (engagement +30%)
- Improved match success by 40% and reduced admin work by 25%

DMT (Document Tool)

Node.js, JavaScript

- Built document processing + NLP module (accuracy +40%)

Clinical Profile

React, Micro Frontend, Node.js

- Developed and integrated REST APIs for healthcare workflows, improving data processing efficiency by 30%
- Implemented micro frontend architecture, reducing deployment dependencies and release time by 40%
- Optimized API performance, reducing latency by 25% and improving system reliability
- Delivered modular features across teams, accelerating development velocity by 20%

Achievements

- “Rising Star” recognition for high-impact delivery
- Multiple awards: Great Job, Team Player

Education

Tula's Institute of Engineering and Management

BE/B.Tech/Bs
